**General remark**

The assembly of the sliced felt stripes results in a discontinuing line. When installing several panels next to each other the stripes will not be a continuous line. The product is developed as such that the patterns between different panels are never build up in the same order, meaning the order of the Felt slices are randomly placed during manufacturing. You will see the seam and the panels will not match up. This is for all versions. No claims concerning deviation in color, size, and thickness can be accepted. Because of the nature of the product this can variate. The risk is more likely in different batches.
